

## **VD 201 TH The future of my vocation - 12.02.2020**

Dear viewers and readers,

today I'd like to talk again about my spiritual vocation, which I have already written and spoken about. God has confirmed this to me several times in recent years.

This vocation is linked to a specific task. The Most High has entrusted me with the new evangelisation of *Europe*, especially the *German*-speaking countries. This is a huge task, so you will certainly ask yourself how a single person, who is also burdened with health restrictions, can manage such a thing.

Here I'd like to point out that God always calls the little ones - and often also the weak. He clearly announced to me on 22 November 2019 that He has even greater plans for me than before. I therefore assume that further areas of responsibility will come my way.

The Eternal has always assured me of His full support: Therefore, I know that I will receive from Him everything I need for the exercise of my activity - both on a spiritual and material level.

However, he also expressly admonished me never to do anything without his consent. So this great work that God has initiated is not about *my* will, *my* ideas or *my* plans, but about the fact that what the *Creator* wants and has planned Himself.

At this point I'd like to emphasize that I am only a tool, an executive helper and mediator, but not the one from whom the big plan originates. From time to time I get small insights into this divine concept. Much of this is still hidden from me and will only be revealed little by little, as God sees fit.

An important part of this journey is now - after 20 years - already behind me. But this was first and foremost a time of preparation for the actual task that is yet to come. – I will, of course, continue to keep you - dear viewers - up to date with the latest news in this regard.
