

VD 227 NE God speaks to the world (Part 2) - 2020-04-04

Dear viewers,

after having given you some insights in video 225 into messages that I have received from God over the last 20 years, I'd like to inform you today about very recent messages that I received only recently, on March 16, 2020.

The Most High said to me: "I will establish a new order."

What does this statement now mean for us humans? It confirms to us that God has begun to actively intervene in the processes on earth. He does this in His very own way.

So we are not concerned here with a new world order created by human beings, as we know it from various conspiracy theories, but with a change designed by God, which affects the entire earth and every single person.

It also means that many things won't remain the same as they were before. We will have to break away from habits, we will have to reorient ourselves, both on a material and a spiritual level.

But the real change will take place on the spiritual level. We now realize that we are not the masters, but that there is someone greater than us above us. This realization must now make us humble and grateful.

The Almighty won't leave us alone in the coming time. He is always with us, in good times and bad. In the good times we often don't want to know anything about God, in the bad times we suddenly remember Him again.

The changes that the Eternal has initiated will not take place without pain. He wants to cause a profound change in our hearts. This is called purification.

The new order that God has announced is one that puts Him back in the first place. God is the Most High. He's above it all. It'll be like that again. We will learn again to bend our knees before Him. This corresponds to the divine order.

There is a second point that the Lord raised that surprised me. He said to me: "The royal houses will be restored to honor." - This statement indicates a social and political change. A renaissance of structures that have existed in earlier times. People will return to conservative values. This has nothing to do with romantic notions.

Use the coming days and also look more often at my homepage. There you will find a lot of content that can be helpful and comforting for you in the difficult time that now follows!
