

## **VD 215 NE A new age - 23.03.2020**

Dear viewers,

as the title of this video already suggests, a new era is now beginning for us as a society, but also for me personally. This brings with it some important changes that will gradually evolve over the coming weeks and months. In this video I'd like to inform you about some innovations and the further timetable.

For the new chapter I have created a separate section on my homepage. You'll find it under the title "The new era". In this section you'll find new articles and videos that I will create for you in the near future. These will be available in three languages so that as many people as possible worldwide can have access to this information.

Please understand that there will be no new book releases in the coming weeks, as I will mainly focus on video production.

The work on my books will continue in the background, and in due course I'll be able to announce new publications. However, I'd ask you to be patient in this respect.

As you already know, I have received a special calling from God. In this context, I'll have various tasks in the near future. They won't be limited to writing books and articles. Very early on I was aware that I'd also be working in an area that has to do with public relations.

Over a very long period - almost 20 years - I have been prepared for these challenges in many small steps by the Most High. He encouraged me again and again and assured me of His comprehensive support.

In fact, He gave me everything I need to carry out my later work. This concerns the intellectual, spiritual as well as the material level. This also includes the personal and character maturation and purification that took place during these years. There were smaller and bigger tests that I had to pass and with God's help I could master them.

So today I feel well prepared, and if you take a look at my homepage you'll also find that this project is now on a broad and stable foundation.

In all my activities in the coming weeks and months I'll again be guided by the will of God, as I am at His service. So I won't take hasty steps, but will adapt my pace to the Creator's schedule.
