

VD 220 TH The Lord of life - 2020-03-27

Dear viewers,

on the occasion of the *Corona* crisis I'd also like to comment on it and present my personal estimation in this video.

Many wonder why we are experiencing this threat from a previously unknown virus at this very moment. Many people want to know whether there is a deeper meaning behind it and whether there are plausible explanations.

First of all, it must be objectively noted that over the centuries there have been repeated events that were not directly caused by man, such as various natural disasters, but also epidemics and diseases. Let us think of diseases like plague, cholera, malaria, etc.

I agree with *Rabbi Raskin* that the ways of God are different from our human ideas and expectations. From my personal experience, I can confirm that the Most High doesn't like when somebody looks in his cards. He has His secrets, His schedule.

Jesus also says in the book of Acts, chapter 1, verse 7: *"It is not for you to know times or seasons that the Father has fixed by his own authority."* - God does not like it when you ask too many questions. But He doesn't leave us completely in uncertainty, but reveals certain contents to us when He sees the right time for it has come.

Already in the Bible we find various predictions about the future. But also in post-biblical times there were revelations and indications again and again. Some of these are quite different, but to a certain extent they have a common main point. In some sources there is talk about the so-called "end times". And just in the Christian tradition there is a certain sequence of events that are to take place before the end of the world.

We do not know whether the time periods are years, centuries or even millennia. There is also little point in worrying about it or constantly remaining in an apocalyptic mood.

There are definitely events that God sends us as tests. In such situations we should pause, reflect on our lives and also take a closer look at our relationship with the Creator. Just when serious diseases come upon us, which carry off many people, we are drastically shown how weak we are as creatures and how great the power of the Most High is.

In the modern world, many believe that everything can be controlled by technology and science. Man succumbs to the temptation to lose himself in fantasies of omnipotence. There's no more room for God.

From personal experience I can say that the Lord observes everything that happens on this earth very closely. Nothing escapes His gaze. He also cares how we behave; whether we do good or evil.

The creation that surrounds us has very complex structures, which all in all result in an order that was conceived and developed by God. Even if some think they already know everything,

year after year we discover new secrets that have not yet been explored. Behind every door that we open, new rooms spread out before our eyes. One human life is not enough to pass through all these glories. In addition, God creates new things again and again. He is like an infinitely bubbling spring from within itself.

Recently I read on the English language site of mystic *Vassula Rydén* (True life in God) the messages of the Lord which He has addressed to *Vassula* in 2019. I find those of January and November 2019 particularly interesting. Unfortunately these have not yet been translated into German.

These contents indicate to us that something will soon change, that the Lord will intervene powerfully. I too have received similar messages from God.

All information doesn't, however, contain any specific time details, but is intended to prepare us for the coming events. We're not supposed to live thoughtlessly. Instead of being occupied with constantly pushing God out of our lives, we should bring Him back into our midst more strongly. He must become our center again.

It's a matter of giving Him the honor that is due to Him and that we so often deny Him. The Corona epidemic is an occasion to remember who gives us life, who has omnipotence and who we are. It is not defiant rebellion against the Creator that is appropriate now, but reverence, humility and gratitude.

Let us use the coming days and weeks for this!
